

The Crown on High

Crown on High is a multifamily residential development that harmoniously blends contemporary design with enduring architectural elements to create an exceptional living experience. The project reinterprets traditional roof-lines with a series of striking gables, establishing a dynamic yet cohesive facade that enriches the surrounding urban fabric. The exterior material palette combines warm wood with dark panels, enhancing the building's form and its connection to the environment while reflecting a commitment to sustainable and responsible design.

Inside, each residential unit is meticulously crafted to optimize space, light, and functionality. Open-plan living areas and large windows maximize natural light, fostering a bright and inviting atmosphere. Thoughtfully designed communal and private outdoor spaces, including a rooftop terrace with panoramic views and a modern fire pit, provide residents with opportunities for relaxation and social interaction. By sensitively engaging with the surrounding architecture and blending contemporary and traditional elements, Crown on High enhances the streetscape and contributes to the ongoing evolution of the community's architectural narrative.
